

BENCHTOP INFRA-RED SAMPLE DRIER

Model 8DIR800

The ideal laboratory tool for safe and fast drying of small samples.

- * The Modutemp, infra-red sample drier offers focussed and evenly distributed infra-red heat across the entire load area.
- * Low power consumption enables any 10amp power point to be used.
- * Run-down timer ensures that samples are not 'over-heated', and allows repeatable performance.
- * Fabricated from stainless steel with a heatproof ceramic load floor, the drier is easy to clean and requires no other maintenance.
- * The low-cost ceramic elements are well protected from accidental impact

Model	External dimensions	Loading area	Power
8DIR800	220 (h) x 605 (w) x 220 (d) mm	150 x 480mm	800W

Modutemp equipment is fully tested prior to shipment and ready for immediate use.
